

## INDEX TO VOLUME 115

### New scientific names are in bold face

- Ailanthus altissima* (Simaroubaceae).  
Albinism found in clonal growth of,  
197–200  
Alaska 61–95  
Albinism found in clonal growth of  
*Ailanthus altissima* (Simaroubaceae).  
197–200 (New England Note)  
Aleutian Range 61–95  
All-terrain vehicles 158–169  
Alpine 61–95  
*Amerina* 170–190  
*Amerix* 170–190  
Anderson, Gregory J. 121–132  
Arctic 61–95  
*Argorips* 170–190  
Asian 28–41  
Asteraceae 281–285  
ATV tracks and density of a rare  
plant (*Drosera filiformis*) in a Nova  
Scotia bog. Correlation between,  
158–169
- Bailey, Scott W. Two fern species new  
to New Hampshire, with comments  
on the generation of calcareous-like  
habitat by base-poor rocks. 286–  
289 (New England Note)  
Barberry 121–132  
Barrington, David S. and Sonja A.  
Schmitz. Quaternary divergence  
and Holocene secondary contact  
via the Northwest Passage in the  
circumpolar *Lathyrus japonicus*  
(Leguminosae). 133–157  
Berberidaceae 121–132  
*Berberis* ~~*ottawensis*~~ 121–132; map of  
locations within Connecticut and  
Massachusetts 129  
*Berberis thunbergii*, *B. vulgaris* 121–  
132  
*Biggina* 170–190  
Biogeography 61–95, 133–157  
Bogs 158–169  
Bowles, Beth D. 112–114  
Bowles, David E. and Beth D.  
Bowles. Evidence of overwintering  
in water hyacinth, *Eichhornia cras-  
sipes* (Pontederiaceae) in southwest-  
ern Missouri, USA. 112–114 (The  
Botanists' Corner)  
Brach, Anthony R. Albinism found in  
clonal growth of *Ailanthus altissima*  
(Simaroubaceae). 197–200 (New  
England Note)  
Brand, Mark H. 121–132  
Brumback, William E. and Jessica  
Gerke. Flora Conservanda: New  
England 2012. The New England  
Plant Conservation Program (NEP-  
CoP) List of Plants in Need of  
Conservation. 313–408; list 322–  
390; index to scientific names 396–  
408  
Burk, C. John and John S. Burk.  
*Heterotheca subaxillaris* var. *latifolia*  
(Asteraceae), a Massachusetts  
record established in a Cape Cod  
heathland. 281–285 (New England  
Note)  
Burk, John S. 281–285
- Calcareous-like habitat by base-poor  
rocks, comments on the generation  
of 286–289  
Cape Cod heathland, *Heterotheca*  
*subaxillaris* var. *latifolia* 281–285  
Carlson, Matthew L., Rob Lipkin,  
Carl Roland, and Amy E. Miller.  
New and important vascular plant  
collections from south-central and  
southwestern Alaska: A region of  
floristic convergence. 61–95; species  
occurrence maps 68–75; annotated  
list of rare taxa and range exten-  
sions 82–95  
Carvalho, Mónica R. 170–190  
*Cassiope* 221–249  
*Chalebus* 170–190

- Circumboreal distribution 221-249  
 Cleistogamy and hybridization in two subspecies of *Triodanis perfoliata* (Campanulaceae). 42-60  
 Cleistogamy, *Triodanis* 42-60  
 Coastal salt pond marsh system 1-27  
 Collections from south-central and southwestern Alaska: A region of floristic convergence. New and important vascular plant, 61-95; species occurrence maps 68-75; rare taxa and range extensions 82-95  
 Connecticut flora 313-408  
 Connolly, Bryan A., Gregory J. Anderson, and Mark H. Brand. Occurrence and fertility of feral hybrid barberry *Berberis xottawensis* (Berberidaceae) in Connecticut and Massachusetts. 121-132; locations map 129  
 Conservation 313-408  
 Correlation between ATV tracks and density of a rare plant (*Drosera filiformis*) in a Nova Scotia bog. 158-169  
 Cusick, Allison W. *Poa bulbosa* subsp. *bulbosa* (Poaceae) in North America: An update. 293-295 (The Botanists' Corner)  
  
*Diamarips* 170-190  
*Diplima* 170-190  
*Diplopia* 170-190  
*Diplusion* 170-190  
 Disturbance 158-169  
*Disynia* 170-190  
*Drosera filiformis* 158-169  
*Dryopteris filix-mas*, new record in New Hampshire 286-289  
  
*Eichhornia crassipes* 112-114  
 Electromagnetic induction 1-27  
 Endangered species 313-408  
 Endemic 61-95  
 Ericaceae 221-249  
 Evidence of overwintering in water hyacinth, *Eichhornia crassipes* (Pontederiaceae) in southwestern Missouri, USA. 112-114 (The Botanists' Corner)  
 Expansion 28-41  
  
 Fern species new to New Hampshire, with comments on the generation of calcareous-like habitat by base-poor rocks. Two, 286-289 (New England Note)  
 Flora. An update on the Middlesex Fells, 191-196  
 Flora Conservanda: New England 2012. The New England Plant Conservation Program (NEPCoP) List of Plants in Need of Conservation. 313-408; list 322-390; index to scientific names 396-408  
 Florida 250-280  
 Floristics of Silver River State Park, Marion County, Florida. 250-280; list of species 263-280  
  
 Gentianaceae 96-111  
 Gerke, Jessica 313-408  
 Gillespie, Emily L. and Kathleen A. Kron. Molecular phylogenetic analysis of the circumboreal genus *Cassiope* (Ericaceae) reveals trends in some morphological and wood anatomy characters and likely reticulate evolution. 221-249  
 Globally rare coastal salt pond marsh system at Odiorne Point State Park, Rye, New Hampshire. A, 1-27  
 Globally rare taxa, New England flora 313-408  
 Goodwillie, Carol and Emily Stewart. Cleistogamy and hybridization in two subspecies of *Triodanis perfoliata* (Campanulaceae). 42-60  
*Gracilaria tikvahiae*; *G. vermiculophylla* 28-41  
*Gracilaria vermiculophylla* (Rhodophyta, Gracilariales) to New England, USA: Estimated arrival times and current distribution. Introduction of, 28-41  
 Gunner, Simon T. 170-190

- Gyandra* 96–111
- Hamlin, Bryan T. and Walter T. Kittredge. An update on the Middlesex Fells flora. 191–196 (New England Note)
- Heterotheca subaxillaris* var. *latifolia* (Asteraceae), a Massachusetts record established in a Cape Cod heathland. 281–285 (New England Note)
- Himalayas 221–249
- Historic taxa, New England flora 313–408
- Historical biogeography 221–249
- Holocene 133–157
- Holocene secondary contact via the Northwest Passage in the circumpolar *Lathyrus japonicus* (Leguminosae). Quaternary divergence and, 133–157
- Hubbard, Jeffery R. and Walter S. Judd. Floristics of Silver River State Park, Marion County, Florida. 250–280
- Hybrid distribution 121–132
- Hybrid fertility 121–132
- Hybridization 221–249
- Hybridization, *Triodanis* 42–60
- Hydrology and salinity gradients 1–27
- Illinois, new record, *Poa bulbosa* subsp. *bulbosa* 293–295
- Introduction of *Gracilaria vermiculophylla* (Rhodophyta, Gracilariales) to New England, USA: Estimated arrival times and current distribution. 28–41
- Introduction of species 28–41
- Invasive plants: *Berberis ×ottawensis* 121–132; *Gracilaria vermiculophylla* 28–41
- Isozymes 133–157
- Judd, Walter S. 250–280
- Kittredge, Walter T. 191–196
- Kron, Kathleen A. 221–249
- Lathyrus japonicus* 133–157
- Lectotypification 170–190
- Leguminosae 133–157
- Lim, Gwynne S., Mónica R. Carvalho, Stephanie M. Stuber, Simon T. Gunner, and James L. Reveal. A reconsideration of the typification of Rafinesque generic names allied to *Salix* L. 170–190
- Lipkin, Rob 61–95
- Locally rare taxa, New England flora 313–408
- Lomatogonium* 96–111; distribution map of varieties in North America 105
- Marion County, Florida, floristics 250–280
- Marsh, salt pond 1–27
- Massachusetts flora 191–196, 313–408
- Massachusetts record, *Heterotheca subaxillaris* var. *latifolia* 281–285
- Mathieson, Arthur C. 28–41
- Melanix* 170–190
- Mesohyaline 1–27
- Middlesex Fells flora. An update on the, 191–196
- Miller, Amy E. 61–95
- Missouri, USA 112–114
- Molecular confirmations, *Gracilaria* 28–41
- Molecular markers 221–249
- Molecular phylogenetic analysis of the circumboreal genus *Cassiope* (Ericaceae) reveals trends in some morphological and wood anatomy characters and likely reticulate evolution. 221–249
- Molecular phylogeny 221–249
- Moore, Gregg E. 1–27
- National Parks 61–95
- Natural communities 1–27
- ndhF-trnH* 133–157
- NEBC Meeting News 116–118, 208–218, 306–309
- Nectolis* 170–190
- Nectopix* 170–190

- Nectusion* 170-190  
 Neefus, Christopher D. 28-41  
 Neotypification 170-190  
 NEPCoP (New England Plant Conservation Program) 313-408  
*Nestylix* 170-190  
 Nettleton, Jeremy C., Arthur C. Mathieson, Carol Thornber, Christopher D. Neefus, and Charles Yarish. Introduction of *Gracilaria vermiculophylla* (Rhodophyta, Gracilariales) to New England, USA: Estimated arrival times and current distribution. 28-41  
 New and important vascular plant collections from south-central and southwestern Alaska: A region of floristic convergence. 61-95; species occurrence maps 68-75; rare taxa and range extensions 82-95  
 New Books 115, 206, 305  
 New England flora 313-408  
 New England, 28-41  
 New Hampshire, coastal salt pond marsh 1-27  
 New Hampshire flora 313-408  
 New Hampshire records, *Pellaea atropurpurea* and *Dryopteris filix-mas* 286-289  
 New record, *Heterotheca subaxillaris* var. *latifolia* in Massachusetts 281-285  
 New records, *Pellaea atropurpurea* and *Dryopteris filix-mas* in New Hampshire 286-289  
 New records, *Poa bulbosa* subsp. *bulbosa*, in Ohio (counties), Illinois (state), and Pennsylvania (state) 293-295  
 Nichols, William F., Gregg E. Moore, Nur P. Ritter, and Chris R. Peter. A globally rare coastal salt pond marsh system at Odiorne Point State Park, Rye, New Hampshire. 1-27  
 Nomenclatural innovations in North American *Physalis* (Solanaceae). 290-292 (Note)  
 Nomenclature 96-111, 170-190  
 Non-native plants 1-27  
 North America 221-249  
 Nova Scotia 158-169  
 Occurrence and fertility of feral hybrid barberry *Berberis*  $\times$  *ottawensis* (Berberidaceae) in Connecticut and Massachusetts. 121-132  
 Odiorne Point State Park, Rye, New Hampshire. A globally rare coastal salt pond marsh system at, 1-27  
 Ohio, new county records, *Poa bulbosa* subsp. *bulbosa* 293-295  
*Oisodix* 170-190  
 Oligohyaline 1-27  
*Opodix* 170-190  
 Overwintering in water hyacinth, *Eichhornia crassipes* (Pontederiaceae) in southwestern Missouri, USA. Evidence of, 112-114 (The Botanists' Corner)  
*Pellaea atropurpurea*, new record in New Hampshire 286-289  
 Pennsylvania, new record, *Poa bulbosa* subsp. *bulbosa* 293-295  
 Peter, Chris R. 1-27  
*Physalis*  $\times$  *elliottii* Kunze, a new hybrid; *Physalis*  $\times$  *elliottii* var. *glabra* (Waterf.) J.R. Sullivan, *comb. nov.* 290-292  
*Physalis longifolia* Nutt. var. *texana* (Rydb.) J.R. Sullivan, *comb. nov.* 290-292  
*Physalis pumila* Nutt. var. *hispida* (Waterf.) J.R. Sullivan, *stat. nov.* 290-292  
 Plants 313-408  
 Plants in need of conservation, New England 313-408  
*Pleiarina* 170-190  
*Poa bulbosa* subsp. *bulbosa* (Poaceae) in North America: An update. 293-295 (The Botanists' Corner)  
 Pontederiaceae 112-114  
 Presumed rare taxa (IND.), New England flora 313-408

- Pringle, James S. Nomenclatural notes on North American *Gyrandra* (*Centaureium* s. lat.) and *Lomatogonium* (Gentianaceae). 96-111  
*Psatherips* 170-190
- Quaternary divergence and Holocene secondary contact via the Northwest Passage in the circumpolar *Lathyrus japonicus* (Leguminosae). 133-157
- Raney, Shanel 158-169  
 Range extension 61-95  
 Rare coastal salt pond marsh system at Odiorne Point State Park, Rye, New Hampshire. A globally, 1-27  
 Rare plant taxa 1-27, 61-95, 158-169, 313-408  
 Reconsideration of the typification of Rafinesque generic names allied to *Salix* L. A. 170-190  
 Refugia 133-157  
 Regional conservation list 313-408  
 Regionally rare taxa, New England flora 313-408  
 Relict flora 61-95  
 Reproductive isolation 42-60  
 Reticulate evolution 221-249  
 Reveal, James L. 170-190  
 Rhode Island flora 313-408  
*Ripselaxis* 170-190  
*Ripsoctis* 170-190  
 Ritter, Nur P. 1-27  
 Roland, Carl 61-95
- Salt pond marsh system at Odiorne Point State Park, Rye, New Hampshire. A globally rare coastal, 1-27  
 Schmitz, Sonja A. 133-157  
 Silver River State Park, Florida, floristics 250-280
- Simaroubaceae 197-200  
*Sokolofia* 170-190  
 Solanaceae 290-292  
 Statement of ownership 119, 414  
 Stewart, Emily 42-60  
 Stuber, Stephanie M. 170-190  
 Sullivan, Janet R. Nomenclatural innovations in North American *Phytolacca* (Solanaceae). 290-292 (Note)  
 Surface and pore water salinity 1-27
- Taylor, Barry R. and Shanel Raney. Correlation between ATV tracks and density of a rare plant (*Drosera filiformis*) in a Nova Scotia bog. 158-169  
*Telesmia* 170-190  
 Thornber, Carol 28-41  
*Triodanis*; *T. perfoliata* subsp. *biflora*; subsp. *perfoliata* 42-60  
*Typha angustifolia* 1-27  
 Typification of Rafinesque generic names allied to *Salix* L. A reconsideration of the, 170-190
- Update on the Middlesex Fells flora. An, 191-196 (New England Note)  
*Urnectis* 170-190  
*Usonianis* 170-190
- Vascular flora 1-27  
 Vermont flora 313-408  
*Vetrix* 170-190  
*Vimen* 170-190
- Water hyacinth 112-114  
 Wheat rust 121-132
- Yarish, Charles 28-41
